

PANHANDLE STATE
FOUNDATION

The Fahrendorf Scholarship

Est. 2004

Pamela Fahrendorf established this scholarship and sent this information:

Panhandle State was very good to me when I was a single parent. Going back to school in 1980, I worked in the Library and for the Head of Teacher Education during my undergraduate days. I helped out in the Bookstore during enrollment. After graduation in Mathematics, I worked for about 15 years as part-time and full-time faculty member in the Mathematics department and the computer Information Systems Department. During this time, I finished my Master's degree at Southwestern OK State and additional hours in several universities in Oklahoma. Both of my daughters attended OPSU and my oldest daughter and her husband are both graduates of OPSU. I have many friends that served on the Faculty and Staff over the years and former students that are in many areas of the panhandle. I am currently on the Computer Science faculty at Southeastern Oklahoma State University in Durant.
