Fill in the blank using the works from your Work Bank.

1. A ________ is a line that has two endpoints?
2. A line has two arrowheads to indicate a line’s ________?
3. A ________ has one endpoint and one arrowhead to indicate its unending quality?
4. Lines in the same plane that do not intersect are called what?
5. ____________ are lines the same plane that are neither parallel nor perpendicular?

Answer the questions with a T for True or an F for False.

6. A perpendicular line is a line that intersects? ________
7. Two intersecting lines are parallel and perpendicular? ________
8. A vertex in another name for a line? ________
9. A ray has one point and an arrowhead? ________
10. Right angles are 180 degrees? ________
11. A small square at the vertex indicates a Right angle? ________
12. An Obtuse angle is less than 90 degrees? ________
13. Oblique lines will make Acute and Obtuse angles? ________
14. An equilateral triangle will have three equal angles?
15. A segment will have at least one ending point? _____

Multiple Choice Questions: Choose the letter that best answers the questions.

16. A Scalene Triangle?
   a. All equal sides.
   b. No equal sides.
   c. Two equal sides.
   d. None of the above.

17. A protractor is used for?
   a. Measure a triangle.
   b. Measure square foot.
   c. Measure an angle.
   d. None of the above.

18. Where is the vertex of an angle located?
   a. Where the parallel lines cross.
   b. In the middle.
   c. On the outside.
   d. Where the two rays come together.

19. An Isosceles triangle has?
   a. Have three equal sides.
   b. Have two equal sides.
   c. Has one equal side.
   d. Have no equal sides.

20. A segment could measure 20 feet?
   a. True.
   b. False.
   c. True and False.
   d. All are true.
   e. None are true.
