PAPER PLATE CLOCK FACE DIRECTIONS

The Paper Plate Clock Faces will be used on the What Time Is It? bulletin board.

Materials Needed:
- Large paper plates with a dot to mark the center
- Red and blue pipe cleaner arrows for hour and minute hands (red cut in 1/3’s and blue cut in ½’s)
- Brads
- Pencil
- Markers

1. Turn the plate over to the back side and write your name in pencil.
2. You will do all the numbering with your pencil.
3. Turn the plate right-side up and write the number 12 at the top of the plate (be sure to have one to show as a sample).
4. Write the number 6 at the bottom of the plate directly under the 12.
5. Write the number 3 on the right edge of the plate between the 12 and the 6.
6. Write the number 9 on the left edge of the plate straight across from the 3.
7. Then, write the rest of the numbers on the clock in their corresponding places (1, 2, 4, 5, 7, 8, 10, 11).
8. After you finish numbering the clock, have the teacher check your clock for correctness.
9. Once your clock has been checked, you can trace the numbers with any color marker you want.
10. After you trace your numbers, draw a face on the center of the clock.
11. Take one red and one blue pipe cleaner and attach them to the brad.
12. Stick the brad through the dot in the center of the plate and spread the back.
13. Your clock is now ready for use.
