

Name: Linda Johnson

Grade Level/Subject: 9th Grade Alt. Ed. Math

Topic: Menu Math

Objectives (P.A.S.S.): Process Standard 4: Connections 1, 3, & 4

Instruction: Solving multiplication, addition, subtraction on the guest check

Instructional process: They will be creating a Guest Check by themselves. They will be creating a Guest Check that a friend wants at the restaurant. They will need to write it on the Guest Check and total up all of the food they ordered. Then they will need to make change for the friend. They are having trouble counting money back so we will work on that a little more.

Closure: They are seeing what they need to do in working with money. They decided they need to practice counting money back to someone. They will be doing that for a for a while.

Assessment: They enjoy this math and they are ready to do it. At least they go right to work when they come into class.

Modifications/Accommodations: I am trying to get them ready for Algebra I next year.

Reflection: The students are enjoying doing this math and they think they are about ready to move on to something else.
